Notes or special instructions

Allow two weeks for return delivery. Slides and film are scanned at a resolution suitable for presentation on a computer monitor or TV screen with automatic dust detection during scanning. Additional editing to correct for excessive dust, scratches or other defects is available for an additional fee. We can also convert 8mm film, VHS, audio tapes, and just about any other media that you might want to share with family and friends and we can create custom presentations for just about any need with voice-overs, custom sound tracks and photographic services. Call or email for a consultation. We take the utmost care with your materials to insure that they get back to you in their original condition. Slides are returned in archival slide storage pages. Should you find that materials have been damaged or lost in handling at our facilities we will compensate you for the replacement cost of the materials.
